FKB DSL & M3 SETUP FOR VISTA

Here's how you setup your connection:

1. Click Start -> Control Panel.

2. Click on Network and Internet icon.

3. Click on Network and Sharing Center icon.

4. Click on **Setup a connection or network** on the left task pane.

5. A new window will popup asking you to choose the connection option. Click **Connect to the Internet** and click **Next**.

🌀 😵 Set u	up a connection or network
Choos	e a connection option
	Connect to the Internet Set up a wireless, broadband, or dial-up connection to the Internet
1	Set up a wireless router or access point Set up a new wireless network for your home or small business.
4	Set up a dial-up connection Connect through a dial-up connection to the Internet.
D =	Connect to a workplace Set up a dial-up or VPN connection to your workplace.
	Next Cancel

6. Now click on **Broadband (PPPoE)** option.

- 7. Do the following on this screen:
 - Enter the User name and Password given by FKB.
 - Type in a name for **Connection name**. This name is to identify your internet connection
 - If you check the box which says "**Allow other people to use this connection**", Vista will allow all the users on the computer to access this connection.

8. Click Connect.

		- • •	
Connect to the Internet			
Type the information from your Internet service provider (ISP)			
User name:	example		
Password:			
	Show characters		
	Remember this password		
Connection name:	Broadband Connection		
🐨 🖂 Allow other people to use this connection			
This option allows anyone with access to this computer to use this connection.			
I don't have an ISP	•		
	Connect	Cancel	

9. If you see the following window then you have successfully established a connection.

10. If you have any issues then you should recheck:

- o User name and password.o Internet connection settings with your ISP.
